Tech Stack

- HTML5 & CSS3
- JavaScript & TypeScript
- AOS.js for scroll animations
- Responsive grid layout
- GitHub Pages for deployment

Brand Narrative

This portfolio reflects:

- **Afro-futurism** — innovation through cultural identity
- **Ethical Tech** — design with dignity and accessibility
- **Cloud-readiness** — scalable systems and modular components

Project Highlights

- Modular project cards with embedded images
 - Mobile-first layout with smooth transitions
 - Sections for Kazilink, Zulutech, Send Money App, Fairness Inspector, and AWS deployments
 - Footer with grid layout and hover effects
 - Animated role banner: Full Stack Developer | Web Designer | Flutter App Developer
-

Hackathon Impact

This portfolio was born from Hackathon 1 — a collaborative challenge hosted by Power Learn Project (PLP) to ignite African creativity through full-stack development.

"I believe technology rooted in culture empowers us to build what truly matters." — Leonard Phokane

Built with resilience and vision, the project reflects storytelling through code, modular mastery, and ethical tech principles.
